

Process for Creating Indicator Baselines Using Group Knowledge and Consensus

A. For each indicator ask:

1. What is the current status: Good or Bad?
2. Has this been getting: Better, Worse, Staying the same?
3. Optional: Is it getting (better or worse): Fast or Slow?

B. This will produce a worksheet something like this:

G ↑ s	Indicator 1
G ↓ s	Indicator 2
B ↑ s	Indicator 3
B ↓ s	Indicator 4
G ↔	Indicator 5
G ↓ f	Indicator 6
B ↔	Indicator 7
B ↓ f	Indicator 8

Possible top priorities for action

C. Which then allows individual indicator curves (with forecasts developed using the same technique) to be depicted on a line graph as the starting point for work on turning the curve. (Indicators without data should be added to the Data Development Agenda.)
